| Product remark                    | All technical parameters apply to the entire lamp/Due<br>to the complex production process for light-emitting<br>diodes, the typical values shown for the technical LED<br>parameters are purely statistical values that do not<br>necessarily match the actual technical parameters of<br>each individual product, which can vary from the<br>typical value/LED lamps contain several electronic<br>components. Under unfavourable conditions these<br>can lead to acoustic noise. In case of resonance even<br>low noise can cause audible effect. Possible factors<br>influencing this are the installation, the design of the<br>lamp holder and the luminaire (acoustic resonance<br>effect) as well as the dimmer or the transformer<br>(harmonics or electronic resonance) |  |
