

aluPAR 56

Halogen lamps with parabolic aluminum reflector PAR56, with pin base

Product family benefits

- Environment-friendly disposal possible due to lamp disassembly
- Easier handling and reduced transportation costs due to up to 50 % less weight
- Robust lamp design for long lifetime
- Increased safety thanks to integrated lamp fuse according to DIN IEC 60432-2
- Full compatibility with ANSI and CE standards

Product family features

- Modular lamp concept
- Light aluminum parabolic reflector and front plate are mechanically connected
- aluPAR 56 and aluPAR 64 available in various wattages for high flexibility

Product family datasheet

Safety advice

To prevent personal injury or damage to property, aluPAR 56 and aluPAR 64 lamps may only be operated in suitable luminaires designed with suitable mechanisms (cover panel etc.) to ensure that in the event of a lamp bursting no parts/shards can escape. Because of the heat produced only heat-resistant lamp connections (holders) may be used. Do not operate near people, or any materials that are flammable, sensitive to heat or affected by drying out. Detailed information is available on request.

Application advice

For more detailed application information and graphics please see product datasheet.
