360° orange light

Excellent hazard warning signal and illumination

Equipped with 16 high-quality, long-lasting LED

High power warning light for visibility and safety in emergency situations

Batteries included

Three AAA batteries are included in the scope of supply

Practical when you are underway

LEDguardian ROAD FLARE is a compact LED warning light for emergency situations on the road, as well as for minor inspection work on your car. Equipped with 16 long-lasting LEDs, the light offers three different modes of operation: flashing, permanently on or torch function. The light's warning function, which emits orange light through 360°, is visible from a far distance and can provide decisive information about a hazard in case of danger. In addition, this LED warning light will impress you with its non-slip, dirt-resistant surface and it is so robustly manufactured that it can withstand being run over by a car. OSRAM provides a 2-year guarantee for this warning light. Note / legal advice: LEDguardian ROAD FLARE is not approved as warning light according to German Road Traffic Licencing Regulations (StVZO).
