

## OT 200/ 220-240/1A4 2DIM P7

OPTOTRONIC - 2DIM NFC IP67 | 2DIM, NFC – constant current LED drivers

### Product family features

- 2DIM functionality (AstroDIM, 1...10 V)
- Wide output current range
- Adjustable and Constant Lumen Output (CLO)
- Short-circuit, overload and overtemperature protection
- High IP protection (IP67)
- 1...10 V dimming (minimum 10%)

### Product family benefits

- Easily programmable by NFC (AstroDIM / Constant lumen)
- High surge protection: up to 10 kV
- High efficiency
- Lifetime: up to 100,000 h

### Areas of application

- Street and urban lighting
- Industry lighting
- Suitable for luminaires of protection class I

## Technical data

### Electrical data

|  |                    |
|--|--------------------|
| Nominal voltage                          | 220...240 V        |
| Input voltage AC                         | 198...264 V        |
| Nominal current                          | 1 A                |
| Mains frequency                          | 50...60 Hz         |
| Power factor $\lambda$                   | $\geq 0.95$        |
| Total harmonic distortion                | $< 10 \% ^1$       |
| Device power loss                        | 17 W               |
| Inrush current                           | 98 A <sup>2)</sup> |
| Max. ECG no. on circuit breaker 10 A (B) | 3                  |
| Max. ECG no. on circuit breaker 16 A (B) | 5                  |
| Max. ECG no. on circuit breaker 25 A (B) | 7                  |
| Surge capability (L/N-Ground)            | 10 kV              |
| Surge capability (L-N)                   | 6 kV               |
| Nominal output power                     | 100...200 W        |
| Maximum output power                     | 200 W              |
| Efficiency in full-load                  | 92 % <sup>3)</sup> |
| Nominal output current                   | 700...1400 mA      |
| Default output current                   | 700 mA             |
| Output current tolerance                 | $\pm 5 \%$         |
| Output ripple current (100 Hz)           | $< \pm 5 \%$       |
| Minimum output current                   | 400 mA             |
| Galvanic isolation                       | basic              |
| Nominal output voltage                   | 121...286 V        |
| U-OUT (working voltage)                  | 350 V              |

<sup>1)</sup> At full load

<sup>2)</sup> Max,  $t_h = 260\mu s$

<sup>3)</sup> at 230 V, 50 Hz

## Dimensions & weight

|   |                     |
|---|---------------------|
| <b>Length</b>                               | 228.4 mm            |
| <b>Width</b>                                | 68.5 mm             |
| <b>Height</b>                               | 39.6 mm             |
| <b>Mounting hole spacing, length</b>        | 215.6 mm            |
| <b>Mounting hole spacing, width</b>         | 42.9 mm             |
| <b>Product weight</b>                       | 1000.00 g           |
| <b>Cable cross-section, input side</b>      | 1.0 mm <sup>2</sup> |
| <b>Cable cross-section, output side</b>     | 1.0 mm <sup>2</sup> |
| <b>Wire preparation length, input side</b>  | 10 mm               |
| <b>Wire preparation length, output side</b> | 10 mm               |

## Product datasheet

|                                  |           |
|----------------------------------|-----------|
| Cable/wire length, output side   | 300±20 mm |
| Cable/wire length, input side    | 590±20 mm |
| Cable/wire length, control input | 220±20 mm |

### Colors & materials

|                 |           |
|-----------------|-----------|
| Casing material | Aluminium |
|-----------------|-----------|

### Temperatures & operating conditions

|  |                        |
|--|------------------------|
| Ambient temperature range                | -40...+55 °C           |
| Temperature range at storage             | -40...+85 °C           |
| Maximum temperature at tc test point     | 90 °C                  |
| Max.housing temperature in case of fault | 120 °C                 |
| Permitted rel. humidity during operation | 5...95 % <sup>1)</sup> |

<sup>1)</sup> Non condensing, absolute humidity: 36g/m<sup>3</sup>

### Lifespan

|              |                                |
|--------------|--------------------------------|
| ECG lifetime | 50000 / 100000 h <sup>1)</sup> |
|--------------|--------------------------------|

<sup>1)</sup> At maximum T<sub>c</sub> = 85°C / 10% failure rate / At maximum T<sub>c</sub> = 75°C / 10% failure rate

### Capabilities

|  |  |
|--|--|
| Dimmable                               | Yes  |
| Dimming interface                      | AstroDIM / 1...10 V / Pulse Width Modulation |
| Dimming range                          | 10...100 %                                   |
| Suitable for fixtures with prot. class | I  |
| Constant lumen function                | Yes  |
| NTC input                              | No   |
| Short-circuit protection               | Automatic reversible                         |
| No-load proof                          | Automatic reversible                         |
| Intended for no-load operation         | No   |
| Max. cable length to lamp/LED module   | 2.0 m <sup>1)</sup>                          |
| Overload protection                    | Automatic reversible                         |
| Number of channels                     | 1  |

<sup>1)</sup> Output wires must be routed as close as possible to each other

### Programming

|                    |     |
|--------------------|-----|
| Tuner4TRONIC       | Yes |
| Programming device | NFC |

### Certificates & standards

## Product datasheet

|                           |  |
|---------------------------|--|
| Type of protection        | IP67   |
| Standards                 | Acc. to EN 61347-1/Acc. to EN 61347-2-13/Acc. to EN 55015/Acc. to EN 61547/Acc. to EN 61000-3-2/Acc. to EN 61000-3-3/Acc. to EN 62384/EN 60598-1(ED.8) |
| Approval marks – approval | CE / CCC / RCM / ENEC 05 / TISI  |

### Logistical data

### Environmental information

| Information according Art. 33 of EU Regulation (EC) 1907/2006 (REACH) |  |
|---|--|
| Date of Declaration   | 14-04-2022   |
| Primary Article Identifier  | 4062172069649  |
| Candidate List Substance 1  | Lead   |
| CAS No. of substance 1  | 7439-92-1  |
| Safe Use Instruction  | The identification of the Candidate List substance is sufficient to allow safe use of the article. |
| Declaration No. in SCIP database                                      | f9327dc7-ae42-40a0-a5d6-4f4e72df6c55   |

### Additional product information

- Input overvoltage protection: the driver withstands an input voltage up to 350 Vac for a maximum of two hours, shut down of the output load might occur in case the supply voltage exceeds the declared input voltage range;
- Output short circuit protection: short circuit current is limited to the actual output current setting without damage to the unit. See typical operating window graph for details;
- Input voltage range: Nominal operation at 198 – 264Vac. Workable at 120 – 277Vac without safety issue (refer to [8] Typical Input Voltage vs. Load), but normal performance such as THD, EMI, lifetime etc are not guaranteed;
- Over temperature protection: the driver is protected against temporary overheating by shutting down until the overheating eliminated; Auto-reversible when temperature back to normal;
- Not suitable to be mounted in ceiling corner
- The LED control gear cannot be abutted against or covered by normally flammable materials or used in installations where building insulation or debris is, or may be, present in normal use.
- The external flexible cable or cord of this driver cannot be replaced; if the cord is damaged, the driver shall be destroyed.
- The dimmer should fulfill at least basic insulation between control voltage and dimming circuit (for Australia and New Zealand).
- The startup time to reach the set output current is less than 2s.
- The protective earth (GNYE/PE wire, housing) has to be connected to the heat sink of the LED module to improve the capability of the system to withstand a surge and EMI in critical luminaires.
- For further details please consult the 2DIMLT2 application guide.
- Output over load/voltage protection: In case the input voltage of the load exceeds the output voltage range which is auto defined by output current setting of the driver ( $V_o = P_o / I_o$ ), it automatically reduces the output current. Auto-reversible without mains power on/off;
- No load protection: the driver automatically adjusts the output voltage to the maximum output voltage which is auto defined by output current setting if no load is connected. Auto-reversible with the correct load connected;

### Ecodesign regulation information:

Intended for use with LED modules.

The forward voltage of the LED light source shall be within the defined operating window of the control gear in all operating conditions including dimming if applicable.

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centres and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.

### Logistical Data

| Product code  | Product description            | Packaging unit (Pieces/Unit) | Dimensions (length x width x height) | Volume                | Gross weight |
|---------------|--------------------------------|------------------------------|--------------------------------------|-----------------------|--------------|
| 4062172069649 | OT 200/ 220-240/1A4<br>2DIM P7 | Shipping carton box<br>10    | 495 mm x 309 mm x 130 mm             | 19.88 dm <sup>3</sup> | 10994.00 g   |

The mentioned product code describes the smallest quantity unit which can be ordered. One shipping unit can contain one or more single products. When placing an order, for the quantity please enter single or multiples of a shipping unit.

### Data privacy

## Product datasheet

This OSRAM driver can be configured using the Tuner4TRONIC software. This requires registering on [www.myosram.com](http://www.myosram.com) and downloading the Tuner4TRONIC software from the Internet. The Tuner4TRONIC software enables users to access and view the operational data of a luminaire or driver via the corresponding programming interfaces. A password key (Config Lock) must be set up in the driver via the Tuner4TRONIC software in order to control which users can access and view operational data. Follow the instructions for password setup. To grant an external person or company rights to access or view operational data, you can assign password keys. In this case, however, you are responsible for ensuring that the third party concerned takes notice of the information described here. However, OSRAM can read out operating data from devices for maintenance and service purposes even when a password key has been assigned. In individual cases, OSRAM will also use its access rights in order to optimize or improve driver hardware and driver functions. In accordance with data privacy principles, any user of operating data (luminaire manufacturers, third parties with access rights) must ensure that personal data (e.g. name, address, location IDs) are only merged with the prior written consent of the person (end user) concerned. The respective user of the operating data is responsible for providing evidence of consent.

---

### Disclaimer

OSRAM products must never be directly exposed to external influences. Always provide adequate protection for relevant applications (covers, housings etc.) otherwise any warranty claim will be invalid.
