## SubstiTUBE Motion Sensor

**High performance LED tubes with integrated microwave sensor for electromagnetic control gears, shatterproof**

- General illumination within ambient temperatures from -20...+50 °C Corridors, stairways, parking garages  
Warehouses Walkways and corridors Storage rooms  
Logistics areas, transport facilities and corridors Car parks

- Suitable for closed luminaires thanks to microwave technology No bending thanks to glass tube Shatter protection thanks to special PET coating Support the implementation of the HACCP concepts from production through to presentation Very high resistance to switching loads Energy savings of up to 90 % compared to conventional fluorescent lamp Quick, simple and safe replacement of fluorescent lamps without rewiring the CCG Also suitable for operation at low temperatures

### Application advice

For more detailed application information and graphics please see product datasheet.

---

### Ecodesign regulation information:

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centres and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.
