Product family datasheet

BATTERYcharge 1010

9-stagechargingcycle
ForeasychargingofLead Acid / AGMbatteries

12V / 24V compatible
Suitable forvehicles from 12V to 24V, thus formost motorbikes, cars and vans

Start/Stop compatible
Suitable for vehicles with Start/Stop system

Reliable, intelligent charging made simple

Discover the Next Generation of Smart Charging – BATTERYcharge 10A.

Meet BATTERYcharge 10A, OSRAM's most advanced smart battery charger, designed to keep you moving with confidence. With up to 10A charging power, this intelligent device works with 12V and 24V systems, making it usable for many cars, vans, and even commercial vehicles.

Thanks to its 9-stage charging process for Lead Acid batteries and dedicated 7-stage cycle for Lithium, BATTERYcharge ensures your battery gets the care it deserves. The built-in repair mode helps restore battery health, while the alternator test diagnoses charging issues before they become problems.

Enjoy real-time monitoring on the bright color LCD display, and take advantage of extra-long cables for easy access in any engine bay. Once your battery is charged, BATTERYcharge automatically switches to maintenance mode, so you're always ready to go. Rated IP65, it's built to perform in different conditions.

Whether you're tackling a battery swap, maintaining a fleet, or just want peace of mind, BATTERYcharge 10A is the ultimate solution for modern drivers.
