

Modified Sine Wave Inverter 12V DC 2000W

12V compatibility producing 230V AC with 2000W of power

Will work with all 12V vehicles to produce 230V main power with 2000W of power for remote working

4000W peak power rating

To handle large power loads when initially starting an electrical device. Will drop back down to 2000W continuous supply

2.1A USB Charging port

To charge mobile phones or smaller electronic devices at the same time as using the main power supply from the inverter

Low battery alarm at 10.5V and low battery shutdown at 10.0V

Low battery alarm to alert operators to the fact that their vehicle battery is being drained and should stop using the inverter. When a vehicle's battery drops below 10V the inverter will switch off to preserve the vehicle battery to allow the vehicle to restart

High-quality inverters for off-grid power needs

OSRAM POWERinvert PRO is an extensive range of professional heavy duty inverters for remote working. Available in either Pure Sine Wave or Modified Sine Wave for both 12V and 24V applications.

OSRAM POWERinvert Pro inverters take the 12V or 24V DC vehicle electrical supply and invert into 230V AC mains power to run and operate electrical equipment from service vehicles.

Pure Sine Wave Inverters produce a sine wave with the same frequency as mains power, with no distortion, to power sensitive electronics.

Modified Inverters have distorted frequency, meaning they will power less complicated products such as fridges and power tools.

Product family datasheet

Safety advice

Tested and certified to the relevant EMC and LVD Directives

Legal advice

CE Approved

Application advice

For more detailed application information and graphics please see product datasheet.
